

Multi Unit Development Opportunities and the Del Taco Prototype

To continue to grow this brand that America loves, Del Taco is interested in multi-unit development agreements. Franchise partners who operate multiple units achieve greater efficiencies in their business and have the greatest potential for success.

The Del Taco restaurant prototype provides seating for 50 customers. We also offer an end cap or inline restaurant for strip mall locations, providing seating for 44 customers, as well as a restaurant with limited or no seating for non-traditional locations like convenience stores, shopping malls, and food courts. The smaller Del Taco restaurants offer a menu similar to that of a full-sized Del Taco restaurant but limited, in most cases, to our core menu items.

A Del Taco restaurant employs approximately 20 to 35 persons for a free-standing restaurant and less for an end cap or inline restaurant, depending on the size and sales of the restaurant.

Under our Development Agreement (see Exhibit D to this Disclosure Document), you will receive the right to develop two or more Del Taco restaurants within a specified geographic area. You must enter into a separate Franchise Agreement (see Exhibit E to this Disclosure Document) for each Del Taco restaurant you open.
